

Using Mobile Devices in Emergencies

Mobile devices and cell phones can be valuable in emergencies.

- If you need emergency assistance, call 911.
- Store emergency contact numbers (ex: for family, friends, police, fire, gas, hydro) so you can find them quickly.
- Store important information about your pets' special needs that you may require during an emergency.
- Access the Manitoba government's mobile flood and highway information website at www.manitoba.ca.
- Find additional resources in the [Links and Resources](#) section of Manitoba's flood website.
- Follow the Manitoba government on Twitter at <https://twitter.com/MBGov> and Facebook at <https://www.facebook.com/ManitobaGovernment> for the latest flood updates and information.
- Road conditions can be checked at www.Twitter.com/MBGovRoads or by calling 511.
- Make sure you have a cell phone wall charger or car charger, as well as an extra battery in your [emergency kit](#).
- Text messaging and talking on hand-held cell phones while driving is against the law in Manitoba. Remember to pull off the road to use your mobile device.
